

## Ioan Sturzu, PhD.

isturzu@gmail.com

(832) 773-2396

### PROFILE

Senior researcher and software engineer in computational physics and large-scale scientific software. Expertise: numerical linear algebra; PDE discretization and solvers (finite difference/finite volume) for heat, wave, and elasticity; inverse problems; differentiable physics with autodiff; reduced-order modeling. Domain experience includes geophysics (diffraction imaging, seismic inversion and migration, anisotropic and heterogeneous media), imaging/spectropolarimetry, CFD, heat transfer, wave propagation, and quantum models. Built and maintained C++/Python HPC codebases with MPI, OpenMP, and CUDA; integrated simulation libraries (VTK, Trilinos, Eigen, OpenFOAM, MOOSE); and delivered packaging, CI, and documentation for research users. Geometry and meshing: mesh QA/repair, voxelization, and signed-distance fields for simulators. Data analysis and signal processing: PCA/ICA/DMD, curvelets; classical and ML methods including SOM, SVM, and K-means. Inventor and co-developer of industrial diffraction-imaging methods used to detect fractured zones in the Earth's subsurface. Clear written and oral communicator. Multilingual: English, French, Romanian.

### TECHNICAL SKILLS

Languages	C, C++, Python, Fortran, Java, Matlab, Mathematica
HPC	MPI, OpenMP, CUDA, Slurm, PVM; BLAS/LAPACK/Eigen/ScaLAPACK; CPU/GPU kernels; containers and job arrays
ML/Num	NumPy, SciPy, JAX, PyTorch, Numba; automatic differentiation; GMRES, CG, Newton–Krylo
Build/UX	CMake, pybind11; packaging with venv or Poetry; Qt
Tools	Git, GDB; UNIX/Linux; VS Code, Eclipse; LaTeX, Markdown, YAML, RST; Blender
CI/CD	Git-based peer reviews and protected branches; PR templates and checklists; CI gates (lint, type, unit, integration); semantic versioning and release notes; GitLab CI staged pipelines; unit/integration tests; release notes and docs
Optimization	gprof, perf, nsys, cProfile, line_profiler
PDE/Sim	Finite-difference and finite-volume solvers for heat/wave; inverse problems; multi-physics coupling
Model Reduction	Dynamic Mode Decomposition (DMD)
Diff. Physics	JAX-based differentiable PDE solvers for multi-physics simulations
Sim Libraries	VTK, Trilinos, Eigen, OpenFOAM, MOOSE
Controls	Optimization and dynamic programming; control-oriented system identification; differentiable costs for embodied simulations
Geom/Meshing	Mesh QA/repair; voxelization of anatomical models; occupancy and signed-distance fields
Data/Formats	HDF5/NPZ volumes; Blender mesh formats; reproducible configs and run logs

### PATENTS

- **I. Sturzu**, A.M. Popovici, T.J. Moser, I. Musat, and N. Tanushev "Diffraction Imaging Systems and Methods using Specularity Gathers," U.S. Patent No. 10,324,204 B1 (Issued 06/08/2019).
- N. Tanushev, I. Musat, **I. Sturzu** and A.M. Popovici "Beam Tomography Systems and Methods," U.S. Patent No. 12,147,003 B1 (Issued 11/19/2024).
- A.M. Popovici, **I. Sturzu**, T.J. Moser, I. Musat, and N. Tanushev "Time Migration Diffraction Imaging Systems and Methods," U.S. Patent No. 9,726,771 B1 (Issued 08/08/2017).
- A.M. Popovici, S. Fomel, N. Tanushev, I. Musat, **I. Sturzu**, and C. Tsingas "Fast Beam Migration Using Plane-Wave Destructor Beam Forming," U.S. Patent No. 9,594,176 B1 (Issued 03/14/2017).

## CURRENT POSITION

**Nanohmics, Inc.**  
*Austin, TX*

**Senior Software Engineer – Scientific Computing**  
July 2021 - present

Research, design and develop multi-physics software applications for government and commercial clients. Code, maintain, test and install software applications for computational physics simulations and signal analysis.

- Developed and maintained calibration and processing software for a uncooled handheld LWIR multi-spectral camera tuned via a reconfigurable plasmonic metasurface filter for broadband and multi-color imaging. Calibration: absolute temperature and emissivity mapping. Processing: concealed-threat and camouflage detection, thermal-crossover contrast enhancement, and standoff spectral pyrometry.
- Developed and maintained a high-performance signal analysis toolkit for fluid flows based on dimensionality reduction (DR) techniques (Principal Component Analysis, Dynamic Mode Decomposition, Koopman Operator Theory; ScaLAPACK).
- Developed and maintained a complex C/C++ code designed to simulate the material response to incident laser radiation.
- Developed and maintained a Python-based development toolkit designed to enable user-friendly tools and workflows based on YAML configuration files, for multi-physics HPC applications in cluster API's.
- Developed and maintained a Python code used to calibrate and process data acquired from a metaoptic imaging spectropolarimeter.
- Developed and maintained a postprocessing Python code designed to invert for values of physical parameters using results of thermographic measurements.
- Implemented reduced-order modeling with DMD for CFD simulations.
- Built a Blender-to-voxel pipeline for human and organ meshes; produced occupancy/SDF grids and per-voxel material maps for PDE solvers and multi-physics simulation.
- Established SLURM-based batch workflows, containers, and CI.
- Ran peer code reviews with Git pull requests: required reviewers and code owners, CI-gated merges (lint, type, unit/integration), and protected branch policies.
- Prepared software releases, wrote software documentation.
- Participated in key research role in Grant Funded Research Projects: wrote proposals, performed research, wrote reports. Wrote research articles for publication.

## PROFESSIONAL EXPERIENCE

**Z-Terra, Inc.**  
*Houston, TX*

**Principal Scientific Software Developer**  
August 2010 - July 2021

- Researched, designed and developed software solutions for the upstream oil and gas industry. Code, maintain, test and install software applications for seismic data processing. Code review using git. Developed and applied in real projects innovative methods for diffraction imaging, demigration and anisotropic migration.
- Developed and maintained ZTK, a complex and highly efficient proprietary software for Kirchhoff migration; features: PSDM, PSTM, Angle-gathers, Anisotropy: TTI+Orthorhombic, Ocean Bottom Migration, Specularity gathers for Diffraction Imaging.
- Developed software applications for seismic data processing: Tomography, LS Inversion, Demigration, AMO, PCA, SOM, KMeans. Applied robustness analysis to existent algorithms.
- Performed seismic processing: PSTM, PSDM, Diffraction Imaging in time or depth, demigration, tomographic velocity updates. Worked in leading role in more than twenty land or marine seismic projects. Participated in certain degrees in many other projects.
- Developed and tested algorithms, maintained software libraries. Designed user interfaces and integrated products in customized software packages. Prepared documentation for software installation, usage and maintenance. Performed post-software development, testing and scientific validation of mathematical models.

- Wrote proposals for Grant Funded Research Projects, performed research, wrote reports. Wrote research articles for publication.

### **Signal Estimation Technology**

*Calgary, AB, Canada*

### **Research Geophysicist**

June 2009 - July 2010

- Developed, implemented, installed, documented and tested applications software for the Seismic Industry. Performed research for implementing new methods (data-segmentation of seismic images, multi-resolution analysis, multivariate; artificial neural network classification).
- Provided client support.
- Prepared and gave presentations.

### **Department of Geology and Geophysics**

*Texas A&M University*

### **Postdoctoral Research Associate**

August 2007 - May 2010

- Performed research in cutting-edge topics of Petroleum Seismology (acquisition and decoding blended marine seismic data, data-driven transform of seismic data).
- Directed research projects and gave seminars for graduate students.

### **Department of Physics and Astronomy**

*Ball State University*

### **Postdoctoral Research Associate**

July 2003 - December 2006

- Performed research (reliability and fault tolerant properties of quantum dot devices against jointly defects at the manufacturing level and thermal effect).
- Wrote and published articles, prepared research projects for National Science Foundation, presented papers in conferences, directed research projects.

### **Beckman Institute for Advanced Science and Technology**

*University of Illinois at Urbana-Champaign*

### **Visiting Scholar**

December 2002 - June 2003

- Performed research in the theoretical study of the physical properties of carbon nanotubes (CNT).
- Conducted modeling and simulation of CNT-based electronic and electromechanical devices.

### **Department of Physics**

*University of Brasov*

### **Assistant Professor**

February 1992 - December 2006

- Taught General Physics classes for engineering students and advanced Physics classes for students in Science.
- Performed research (Wave propagation in inhomogeneous media, Quantum Mechanics.)
- Directed graduate student research projects.

## **EDUCATION**

### **PhD.** Theoretical Physics

University of Bucharest, Romania

1997 - 2002

### **B.S./M.S.** Theoretical Physics

University of Bucharest, Romania

1986 - 1991

## **PROFESSIONAL CERTIFICATIONS**

### **MITx**

Certificate ID:

6.00.1x: Introduction to Computer Science and Programming Using Python  
67a26ae8541c463897b5b64aefa3b2d8

### **MITx**

Certificate ID:

6.00.2x: Introduction to Computational Thinking and Data Science  
15e9791902cc4f3587aa37dcff46a66d

## OTHER PATENT APPLICATIONS

- A.M. Popovici, P. Sava, **I. Sturzu**, S. Hardesty, I. Musat, and N. Tanushev "Seismic Imaging Systems and Methods Using Extended Image Gathers," U.S. Provisional Patent Application No. 61/771,013 (Filed 02/28/2013).
- **I. Sturzu**, A.M. Popovici, T.J. Moser "Diffraction Imaging Systems and Methods Employing Principal Component Analysis (PCA) Filtering of Specularity Gathers," U.S. Provisional Patent Application No. 62/435,617 (Filed 12/16/2016).

## MEMBERSHIPS

**Sigma Xi** - Active Member  
**Society of Exploration Geophysicists (SEG)** - Active Member

## PROFESSIONAL CONFERENCES

**SEG Annual Meeting 2017** - Program Committee Member  
Section Organizer, Session Chair: Diffraction Imaging and Modelling

## GRANT FUNDED RESEARCH PROJECTS

- "Extensible Toolkit for Signal Analysis," Air Force SBIR AF221-0029, manager: Sebastian Liska, Nanohmics Inc., Phase I: 2022-2023, Phase II: 2023-.
- "Mutliphysics Modeling Software for Directed Energy Bioeffects," Air Force SBIR AF191-017, manager: Sebastian Liska, Nanohmics Inc., Phase II: 2022-2023.
- "Compact Imaging Spectropolarimeter Based On Multifunction Meta-optic," NASA SBIR 80NSSC22CA172, manager: Mark Lucente, Nanohmics Inc., Phase II: 2022-2023.
- "High Resolution Diffraction Imaging of Natural Fracture Zones in Unconventional Shale Reservoirs for Well Placement Optimization," Department of Energy Grant DE-FOA-0000969, manager: Alexander M. Popovici, Z-Terra Inc., Phase I: 2014-2015, Phase II: 2016-2017.
- "High Resolution Diffraction Imaging of Natural Fracture Zones in Unconventional Shale Reservoirs for Well Placement Optimization," Department of Energy Grant DE-FOA-0000969, manager: Alexander M. Popovici, Z-Terra Inc., Phase I: 2014-2015, Phase II: 2016-2017.
- "Enterprise Software for Interactive and Super-Efficient Processing of Large Multi-Dimensional Datasets," Department of Energy Grant DE-SC0007449, manager: Alexander M. Popovici, Z-Terra Inc., 2012.
- "Center of Excellence in Computational Nanoscience," State of Indiana 21st Century Research and Technology Fund, managers: Ronald Cosby, Yong Joe and Mahfuza Khatun - Ball State University, 2003 - 2005.
- "A New Class of Nanostructured Materials: Graphite Polyhedral Crystals," Department of Energy Grant DE-FG02-01ER45932, manager: Slava V. Rotkin - Beckman Institute, 2002-2003.
- "Manipulation of Carbon Nanotubes for Integrated Nano-electromechanical Systems (NEMS)" University of Illinois at Urbana Champaign CRI grant, manager: Slava V. Rotkin - Beckman Institute, 2002-2003.
- "An Informational Probabilistic Study of Theoretical and Applied Aspects of Physical Measurements," National Council of Scientific Research (CNCSIS Romania) Grant 33630-12-5, co-manager with Prof. Spiridon Dumitru, Physics Department, Transylvania University Brasov, Romania, 1999-2001.
- "Imperfect Measurements using Stern-Gerlach Device ," National Council of Scientific Research (CNCSIS Romania) Grant 5005-1338, co-manager with Prof. Spiridon Dumitru, Physics Department, Transylvania University Brasov, Romania, 1998.
- "Solving Some New Models for Stern-Gerlach Experiment ," National Council of Scientific Research (CNCSIS Romania) Grant 4005-B1, co-manager with Prof. Spiridon Dumitru, Physics Department, Transylvania University Brasov, Romania, 1997.
- "Wave propagations in non-homogenous media," European Project COPERNICUS CIPA-CT94-0132, manager: Prof. P.P.Delsanto, Physics Department, Turin Polytechnics, Italy, 1997-1998.

23. I.Sturzu, T.Barclay and M.Khatun - Numerical Simulations for Quantum-dot Cellular Automata Devices, 2005 Joint Spring Meeting Ohio Section of APS and the Southern Ohio Section of AAPT, April 8-9, 2005; Dayton, OH.
24. I.Sturzu and M.Khatun - Quantum Method for Fault Tolerance Calculations in Quantum-dot Cellular Automata Clocked Devices, 2005 American Physical Society March Meeting, Los Angeles, March 21-25, 2005.
25. T.Barclay, I.Sturzu and M.Khatun, Defect Tolerance Properties Calculations for Quantum-dot Cellular Automata using intercellular Hartree Approximation, 2005 American Physical Society March Meeting, Los Angeles, March 21-25, 2005.

26. M.Khatun, I.Sturzu, L.Kanuchok and D.Tougaw, Fault Tolerance Calculations for Quantum-dot Cellular Automata devices, American Physical Society March Meeting, Los Angeles, March 21-25, 2005.
27. I.Sturzu and M.Khatun, Approximation methods in the study of temperature effect in Quantum-dot Cellular Automata and comparison with full-basis quantum calculation, Indiana Academy of Science Fall Meeting, Hanover College, October 28-29, 2004.
28. T.Barclay, M.Hendrichsen, I.Sturzu and M.Khatun, Defect Tolerance Calculations for Quantum-dot Cellular Automata, Indiana Academy of Science Fall Meeting, Hanover College, October 28-29, 2004.
29. I.Sturzu, M.Khatun and M.Hendrichsen, Quantum Calculation of the Thermal Effect in Quantum-dot Cellular Automata - Understanding Complex Systems Symposium: Networks, UIUC, May 17-20, 2004.
30. I.Sturzu and M.Khatun, Quantum calculation of the QCA response function for non-zero temperatures - Bulletin of the American Society of Ohio Section Spring Meeting, Ohio University, Athens, Ohio, April 16-17, 2004.
31. M.Khatun, I.Sturzu, L.Kanuchok and D.Tougaw, Statistical Study of Thermal Effect in Quantum-dot Cellular Automata - American Physical Society March Meeting, Montreal, Canada, March 23-26, 2004.
32. L.Kanuchok, I.Sturzu and M.Khatun, Thermal Effect in Quantum-Dot Cellular Automata - Indiana Academy of Science, 119th Annual Meeting, October 16-17, 2003.
33. I.Sturzu, L.Kanuchok, M.Khatun, and D.Tougaw, Quantum Statistical Calculations for Thermal Effect in Quantum-Dot Cellular Automata - Ohio American Physical Society Meeting, Cleveland, OH, October 17-18, 2003.
34. I.Sturzu and S.V.Rotkin, "Quantum mechanical study of nanotube devices", NSF Colloquium: "Communication and Integration in Nanomaterials", September 30 – October 2, 2002, Transylvania University, Romania.
35. I.Sturzu – Stochastic Treatment of an Open Quantum System, The Annual Conference of the Romanian Society of Probability and Statistics, February 26, 1999, Bucharest, Romania.
36. N.Cretu, N., G.Nita, I.Sturzu, C.Roșca - A semianalytic method for study the acoustic pulse propagation in elastic inhomogeneous 1-D media, 5th International Conference on Integral Methods in Science and Engineering IMSE 98, Michigan Tech, August 10-13 1998, Houghton, MI, USA.
37. M.Scalerandi, N.Cretu, S.T.Chiriacescu, I. Sturzu, C.Rosca - A Method for Simulation of Gaussian Pulse Propagation in an Elastic Medium with Periodical Inhomogeneity, 2nd International Conference on Computational Acoustics and its Environmental Applications, June 4-6, 1997, Acquasparta, Terni, Italy.
38. T.S.Chiriacescu, N.Cretu, C.Rosca and I.Sturzu - Computer simulation model for rectangular pulses propagation in elastic medium with periodical in-homogeneities, 4th National Symposium of the Romanian Association of Non-destructive Examinations, May 21-23 1997, Poiana Brasov, Romania.
